

Practical perspectives in healthcare imaging

ECR 4 – 8 March 2005 Austria Center

PHILIPS

At this year's ECR, Philips Medical Systems is once again proud to bring you practices and products that expand your capabilities, help you make the most of resources, and ease and improve procedures.

Three symposia, integrated into the ECR educational program, examine new applications in CT and MR imaging, in applying PET/CT and Molecular Imaging for diagnosis and treatment, and in musculoskeletal and nerve ultrasound. These practices, at the forefront of current imaging, are good examples of Philips' dedication to usable technology that tackles common, as well as emerging challenges.

Of course, we would also be delighted to see you at the Philips stand (Hall B, booth 208), to explore the many ways our advanced digital imaging technologies can help with the day-to-day issues you face.

Sunday, March 6th, 12.15 – 13.45, Room: E2

Breakthrough applications in CT/MR Imaging

Moderator:

Gerard Winkels, Philips Medical Systems, Best, The Netherlands

3.0 Tesla Cardiac Imaging

Dr. G. Ligabue, University of Modena, Italy

Panorama 1.0T Open MR and its clinical Outcome

F. de Graaf, Philips Medical Systems, Best, The Netherlands

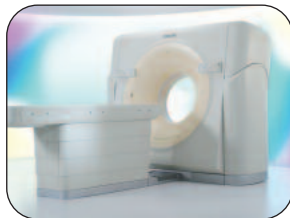

CT Colonography – are we ready for clinical routine?

Dr. Andrik Aschoff, University of Ulm, Germany

New Challenges in MDCT from 16 to 64 Channels

Prof. Dr. Mathias Prokop, University Medical Center, Utrecht, The Netherlands

Lunch boxes
will be provided.

Monday, March 7th; 14.00 – 15.30, Room: E1

Open PET/CT Imaging in Diagnosis and Treatment

Moderator:

Dr. Matthias Egger, Philips Medical Systems, Switzerland

PET/CT: A Major Advance

Dr. Gary Cook, Royal Marsden Hospital, Surrey, UK

Diagnostic Multimodality Imaging of Cancer Beyond PET/CT

Dr. Helle Hendel, Herlev Hospital, Copenhagen, Denmark

Using Gemini PET/CT Information to Optimise Radiotherapy Treatment Planning With Pinnacle

Dr. Wilfried Pilloy, Centre Hospitalier de Luxembourg

Recent Advances in Molecular Imaging Technologies

Dr. York Haemisch, Philips Medical Systems, Germany

Monday, March 7th; 14.00 – 15.30, Room: F1

Latest Advances in Musculoskeletal and Nerve Ultrasound

Moderator:

Jim Walchenbach, Philips Medical Systems, Germany

Ankle/Foot ultrasound and ultrasound guided musculoskeletal interventions

Dr. Andrew Grainger, Leeds General Infirmary, Leeds, England

Nerve ultrasound: A New Application

Prof. Dr. Gerd Bodner, University Hospital, Innsbruck, Austria
